

Care Plus® Insect SOS Gel works to calm and soothe the skin after a bite or sting from an insect, such as a mosquito, wasp, or horsefly. This small tube with a useful tip also works soothing after contact with the stinging hairs of the processionary caterpillars or a jellyfish sting. Apply a thin layer on and around the bite. The gel has a pleasant scent. Repeat as necessary. Suitable for children aged two and older.

Warnings: For external use only. Avoid contact with the mouth, eyes, open wounds, and mucous membranes. Keep out of the reach of children. Do not use if you are allergic to any of the ingredients. If symptoms persist or worsen, consult a doctor. Contains limonene.

### IN SHORT

- Specially developed to soften and calm the skin following insect bites
- Suitable for children aged two and older
