

Tap water in Western Europe and North America is of good quality. Elsewhere in the world, however, we recommend taking additional measures to purify drinking water (or buying bottled water). If you're heading out into the wilderness, there's a good chance you won't have reliable access to clean drinking water. The water may be contaminated with microorganisms, bacteria, and viruses –not the kind of water you want to drink. An inexpensive way to purify water is with the outdoor Care Plus® Water Filter and the Hadex® water disinfectant by Care Plus®.

The Care Plus® Water Filter is a multi-purpose water filtration system. Microfibrinous tubes (0.1 micron absolute) filter up to 3500 litres and capture harmful bacteria and protozoa. It filters up to 1.8 l/m from any freshwater lake, river or stream. The filter can be attached to the included TPU squeeze pouch, standard disposable water bottles or hydration packs. Or use as a straw to drink directly from your water source. The filter element can be removed from the housing for easy cleaning. The ultra-light water filter weighs only 75 grams.

Based on technology used in medical dialysis, the 0.1 micron absolute filter uses a cluster of micro-fibrous tubes. Water is drawn through the side walls of the tubes into their hollow centre and out through the end of the tubes. Harmful bacteria and protozoa are trapped on the outer walls of the tubes.

IN SHORT

- Capacity up to 3500 litres, depending on water quality
- Ultra-light, Filter 75gr / TPU pouch 35gr
- Fits in the palm of your hand
- Easy to clean
- Filters 99,9% of bacteria (E.coli)
- Filters 99,9% of parasites and protozoa (giardia lamblia ground and cryptosporidium)
- Filters microplastics

PRODUCT SPECIFICATIONS

NAME	ARTICLE NR. / EAN CODE		WEIGHT WATERFILTER	WEIGHT SOFT FLASK	DIMENSIONS Ø X H	ORDER QUANTITY
CP® Water Filter - Jungle Green	34150	8714024341507	75 g	35 g	4,5 cm x 15 cm	1
CP® Water Filter - Sunrise Orange	34151	8714024341514	75 g	35 g	4,5 cm x 15 cm	1

Content

0.1 Micron absolute hollow fibre membrane filter, one 1L reusable TPU squeeze pouch, filter tip cap and instructions.

Material

Housing and caps: ABS (BPA-free and food quality, Complies with EU commission regulations)

For long storage, we recommend that you thoroughly clean and dry the Care Plus® Water Filter a dry storage and out of direct sunlight.
